Subject: Kampachi Farms - proposed Fish Farm

Hello,

I am writing to express my opposition to the test farm that is being proposed for the Gulf of Mexico.

The concentration of fish in netted pens would create more problems than it would solve by dumping large amounts of fish food into the fish farm pens, disrupting the natural order of things.

Another concern is that large amounts of concentrated fish waste from the fish pens will pollute areas of the Gulf.

An additional concern is that dousing the open water fish pens with fish antibiotics is akin to opening Pandora's box in the Gulf.

Finally, considering the likelihood of red tide blooms emerging in the vicinity of the farm, this could present yet another ecological disaster.

All things considered, this is a bad idea which should be shut down immediately.

Sincerely,

Ex. 6 Personal Privacy (PP)
